SUBJECT: Uniform Conventions for NIS-Turkey (Tentative).  
(Revised)

In order to develop the NIS-Turkey (Tentative) uniformly, it is requested that the following conventions be observed in the preparation of the text.

1. Text Headings. Topical headings will be indicated by the following sequence of letters and numbers:

I. (Chapter)	Text follows on new line.
I. (Section)	do.
A.	do.
(1)	do.
(a)	Text follows on same line.
1.	do.

1.	do.
a.	do.

2. Pagination. The section rather than the chapter will be the basic unit for numbering pages. Each page will carry the section and page number (i.e., Section 3, page 2, would be written "Page 3-2"). The attached sample page indicates the general layout to be followed.

3. Graphic Material. There will be three types of graphic materials: Figures, Plates, and Maps.

a. Figures include material such as black and white line cuts that can be printed with the text on ordinary paper.

b. Plates consist of coated sheets upon which are grouped photographs or other material requiring special paper.

c. Maps consist of material appearing on fold-in inserts.

Each type of material will be numbered separately, by sections. (In final printing, captions will appear at bottom of figures and plates, in upper right corner of maps.)
